

Amendments to the Specification

Please replace the last paragraph on page 12 with the following amended paragraph:

This example shows a process according to the invention. The extraction column 20 was run at a solvent to feed ratio of 1.25 and a temperature of 50°C. The overall olefin/paraffin recovery in the stream 24 was 89.9%. The olefin/paraffin ratio in the feed was 1:3.7 and 1:3.6 post oxygenate ~~ext~~ extraction.
